

Water is Life

Every creature great and small
needs water to live.

That's why we say, "Water is life.
It is precious."

In Louisiana, we are lucky to have so much
fresh water,
flowing in our bayous, rivers, and canals.

Criss-crossing our state carrying life,
like veins,
through a person's body.

We should respect our water.
Keep it healthy
and treat it with care.

As we would with our own bodies.
Because water is life.
